# 5<sup>TH</sup> EUROPEAN FORUM GAS 2007

# in Paris

1 2<sup>th</sup> and 1 3<sup>th</sup> S e p t e m b e r 2 0 0 7

MARCOGAZ and AFG invite you to the well established European Forum Gas 2007. It will take place in the heart of Paris, in Palais des Congrès, Porte Maillot.

High Level presentations from Officials and Gas Industry Experts are highlighting a broad range of issues of current interest for the gas sector:

- **Energy efficiency:** Now a top priority on the EU Energy Policy agenda. The use of new technologies such as micro CHP or the development of innovative energy services to the customers will contribute to a sustainable environment.
- **Asset Management:** Plays a key role in performance and profitability of gas networks operators. The regulated liberalization process reinforces the importance for managing gas transmission and distribution assets in a very efficient way using appropriate performance indicators.
- **Gas quality:** A major step towards the completion of the single European gas market. But gas appliances have a limited ability to tolerate wide variations of gas characteristics. Biogas is now a reality in the supply scenario but what are the technical issues related to its injection into gas grids?
- **Research & Development:** Collaboration between gas companies in research projects is essential to maintain a high ratio between benefits and costs. Innovative solutions determine future success.

EFG 2007 offers you free access to the important **Expogaz\*** exhibition where you have the opportunity to meet manufacturers and institutions from all over Europe.

Registration and accommodation information will be available shortly on the **MARCOGAZ\*** website.

The Gas Conference, Paris 2007 will take place in the same premises in parallel to EFG 2007.
